

**FOR IMMEDIATE RELEASE: May 27, 2008, West Hills, CA**

**EXHIBIT LIGHTING GROUP POISED TO RELEASE WEBINAR CHAPTER 2.**

**Exhibit Lighting Group** will release its Chapter Two Webinar, "Tools of the Trade," on Thursday, May 29, 2008. The second in the eight-part monthly series, Tools of the Trade rides on the coattails of last-month's debut webinar. "We were absolutely thrilled with the response to 'Back to Basics' (Webinar, Chapter One). The requests literally poured-in after its debut, and we still haven't stopped receiving positive feedback about it," remarked Jeff Rudner, President and CEO of Exhibit Lighting Group. The company has received nearly eight-thousand requests for the initial offering.

"Tools of the Trade" will educate viewers about a host of accessories that are commonly utilized to shape and accent light to form the creative final product that is seen in exhibits, corporate meetings and special events. Roughly seven minutes in length, the Webinar's content-rich format is designed to inform first-time or returning viewers to Exhibit Lighting Group's Webinar series.

"Tools of the Trade" is the second Webinar Chapter in Exhibit Lighting Group's series: *Best Practices in Theatrical Lighting and Production*, an eight-chapter series available for free. Subsequent chapters will be released and available for download monthly through December (skipping August for summer break) and include topics such as new technology, design trends, and practical applications.

All of Exhibit Lighting Group's educational materials are available at no charge by visiting the Education page of the company's web-site, [www.exhibitlightinggroup.com/education](http://www.exhibitlightinggroup.com/education), and following the instructions.
